

# Temperature Sensors: Standard Applications Thermocouples

Hose Clamp Size	ANSI Type	Junction Type	Part Number
1-12"	J K T E	Grounded	T□BC□-72.0G

**CONVECTRONICS' Pipe Probe** is designed for use in applications where Heat Pipes, Water, Band Heaters or Round products require surface temperature measurements. Having an adjustable Stainless Steel Hose Clamp allows this unit to be used extensively over a large range of sizes.

### HOW TO ORDER:

Sheath Size Dia.	Sheath Material	ANSI Type	Junction Type	Part Number
1/8	316 ST. STEEL	J K T E	Grounded	T□BA2-06.0G
3/16				T□BB3-06.0G

**CONVECTRONICS' Sabre Thermocouple** has been specifically designed for use in the food industries. The all-stainless steel construction with teflon insulated extension leads is completely autoclavable. Having a pointed tip this assembly lends itself to applications where semi-frozen, hard or raw foodstuffs must be penetrated for exact temperature readouts during preparation stages.
